Personal skills and competencies

Language	Understanding	Speech	Writing
English	9	7	8

Driving license: B category

Organizational skills and competencies

Working in a team, discipline, obedience, desire to learn new technologies and tools, fast learner, honest

Computer skills and competencies

In college I encountered many programming languages and tools, some of them are: C++, Vue and Vite, MySQL, SQL Server, Sqlite, Postgre, MongoDB, Firebase, Big Data Analytics using Python, C#, Java, Javascript, Git, PHP Laravel, Tensorflow, Node.js and many others. At the previous workplace I only using few technologies like Kotlin, Laravel, Docker, Bash, ADB, SSH.

On my current job, I mostly use Python, Docker, IoT devices, bash scripts, cronjobs and automation, managing web servers and REST APIs, web scraping, managing DNS, E-mail servers, microservices, MQTT, influx, jenkins pipelines, alerting systems. I use Linux every day, and I also spend a lot of time programming the Raspberry Pi and stuff for automation. I have a lot of experience especially into managing servers, also in a hardware, too. Sensoring systems using Raspberry Pi or remote toggling relays or a devices. Everyday I am learning something new and trying to improve my skills even better.

Other skills and competencies

Playing handball in my freetime
